② Connect using SSH applications such as Putty, MobaXterm, or Windows Terminal.

③ ssh [userid]@olaf.ibs.re.kr -p 4022 entered > ssh ibs_test@olaf.ibs.re.kr -p 4022

ssh ibs_test@olaf.ibs.re.kr -p 4022

If you make changes using Putty or MobaXterm, the window may close automatically, making it impossible to confirm whether the password has been changed. Therefore, we recommend using the terminal installed on the OS.

④ Please verify if the 'Password expired' message appears as shown in the picture and whether password change is enabled.

If 'Current Password' is visible, it's activated.

WARNING: Your password has expired.

You must change your password now and login again!
